WE GUARANTEE TO SATISFY YOU AND SAVE YOU MONEY

We guarantee to save you money, to satisfy you perfectly, to make safe delivery of all seeds, bulbs and plants. (See plant Guaranty elsewhere).

Our seeds and bulbs are guaranteed as to purity and vitality to the full amount of the purchase price. You can have your money back any time within a year if you are not satisfied with our seeds. Success with seeds depends largely upon soil and climatic conditions and it is also acknowledged that a mistake can be made in planting, therefore, it is mutually agreed that in no case shall we be liable for more than the amount actually paid for the seed. We also guarantee every article in this catalog to be honestly described and illustrated.

HOW TO ORDER BY MAIL—It is very easy to order seeds from us by mail. In making out your order the first thing to do is to see that you have your Name, Post Office, R. F. D. and Box, County and State in full in the places designated for the purpose. Write the variety below, quantities you want and carry out the prices after each one. Enclose the total amount in any convenient form of remittance with your order and mail to us and we will see that your order reaches you in the best of condition. (Be sure and use our order sheet if you have one.)

CUSTOMERS ATTENTION—When making out your seed order, kindly keep the vegetable and flower seeds separate on your order, which will make the filling of the order much easier and quicker.

HOW TO SEND MONEY—Remittances can be sent safely either by Post Office Order, Bank Draft, Express Money Order, Check or by Registered letter.

DELIVERY—Orders for seeds will be filled and sent as soon as received. Plant orders will be sent as early in the spring as the weather is safe, unless earlier shipment is requested.

REMEMBER that Canadian and foreign postage stamps have no value in the United States.

Dutch Bulbs for Early Spring Flowers

We issue a fall list of Dutch Bulbs each fall, along with plants and other bulbs that are suitable for fall planting such as the Madonna Lily, etc., which cannot be planted any other time of year and to all those that are interested we will either send them our old list or the new list later in the season on request. Orders for this stock are shipped during the months of September, October and November. As most all fall planting bulbs are grown in Holland, it is advisable to place your orders early, for late orders are often returned, for it takes about a month to get our bulbs from Holland after they are shipped. Drop us a card if interested, today.

AQUATICS or WATER PLANTS

CULTURE: Secure a butter or lard tub from your Grocer and use good rich soil with cow manure mixed with it or any good commercial fertilizer. Place one bulb in each container, covering up to crown. Sand or gravel can be used on top to prevent discoloration of water and also to prevent fish from disturbing bulb. Allow from 10 to 18 inches of water on top of bulb for best results. PIKE'S "Can't Be Beat" Flower Seed

Flower seed listed under this heading will not live over winter in the northern states and where hardy annuals are sown in the fall they should be protected after the ground freezes. By following the directions given these seeds will give wonderful results.

CAUTION—Great care should be taken to sow the seed SHALLOW and to cover as thinly as possible with sifted soil or sand and press firm with a board then cover lightly with Granulated Peat to conserve the moisture. This prevents soil from crusting. Keep watered frequently so that the soil will not crust on top, for the tender sprouts cannot push through the hard surface unless kept moist. Be very careful when watering not to wash the soil or sand and expose the seed, for if you do the germination will be destroyed. If possible use a FINE rose top sprinkling can when watering. (By following these instructions carefully, one will be surprised how easy it will be to succeed with my seed which has a high germinating test.
